UPDATE

Use a password keeper on the cloud with complex passphrases instead of passwords, and use 2-factor authentication for sensitive sites like banking.

1password.com

REMIND

Utilize fun posters for cyber security reminders.

selinc.com/solutions/sfci/cybersecurity-posters/

YOURSELF OWNER / MANAGER

CREATE / UPDATE HANDBOOK

You are serious about cyber – lead by example. Keep it small and simple. All information from the “your staff” section should be included in your handbook.

blog.malwarebytes.com/101/2016/03/how-to-create-a-successful-cybersecurity-policy/

CREATE A DIGITAL TRANSACTION POLICY

Require offline confirmation of digital transactions. This should also be included in handbook.

CREATE BACKUPS ON A SET SCHEDULE

Consider remote and offline options.

idrive.com

crashplan.com/en-us/

MINIMIZE DATA COLLECTION

Keep and use only what you need.

INVENTORY HARDWARE AND SOFTWARE

Who has it and where? What devices are people using for work?

ATTACK PLAN BEFORE AN EVENT

MEET WITH A CYBER COMPANY

A cyber consultant is like an lawyer or accountant for cyber security. Have one you can call. You will need a relationship beforehand for NDA. Typical cost will be \$100 - \$600 / hour. To find a cyber company to help with HIPAA compliance, look for the “HiTrust” Certification.

ATTACK PLAN BEFORE AN EVENT CONT.

CONSIDER CYBER INSURANCE

Typically a \$25-\$50 rider on regular insurance. Make sure to ask the right questions, understand the type of insurance and scope of coverage: first versus third party.
